## Report Comments

Course (if more than one course is listed, it is a crosslisted course (responses are combined into one report)): (MATH 54400 (LEC) 23212 REAL ANALYSIS MEASUREMENT THEORY (Maxim Yattselev maxyatts@iupui.edu))

**Indiana University–Purdue University Indianapolis  
IUPUI Course Evaluations - 2022 Fall**

**Interpretation guidelines**

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

Dr. Yattselev is one of the best professors in the Math Department. He is passionate about the subject and emphasizes how vital measure theory is for our academic careers. Homework assignments played a significant role in my understanding of this subject; the problems were chosen carefully and would help me train each concept presented in lectures. The only point I think could have been done differently was the midterm. We had specialized in many different and important techniques in homework assignments, and I was expecting at least a few of them to appear in our test. Apart from that, this was the best course in Real Analysis I have taken, and I would definitely like to take another class with Dr. Yattselev in the future.
