Demographic Information

A) Class Standing

B) Projected course grade

C) Course required?

D) Course in major field?

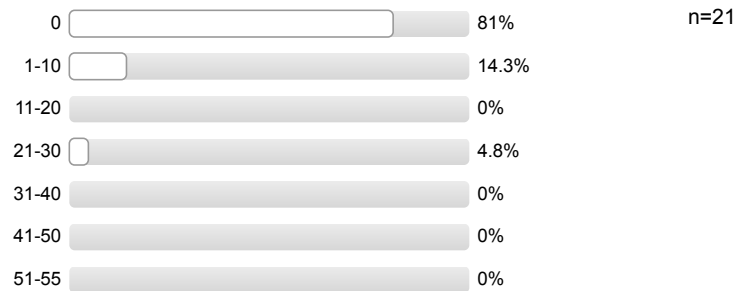

E) Percent of class sessions attended

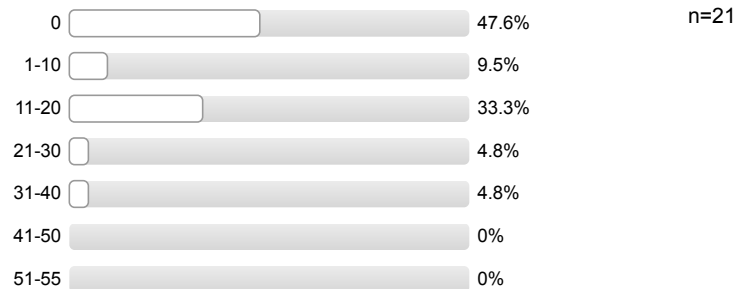

F) Hours/week spent on course outside of class

G) Hours/week employed for pay on campus

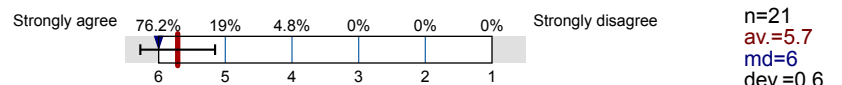

H) Hours/week employed for pay off campus

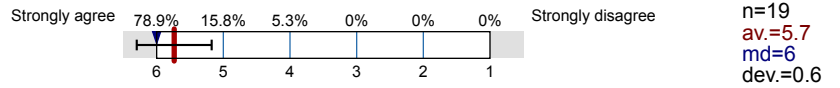

Perceptions Of Your Instructor

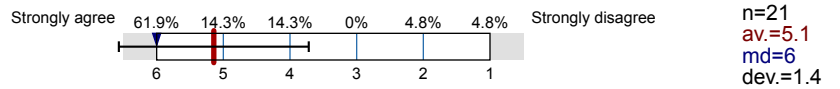

1) My instructor is well prepared for class.

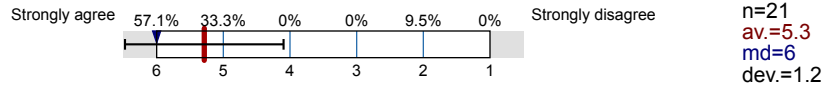

2) My instructor organizes the class well.

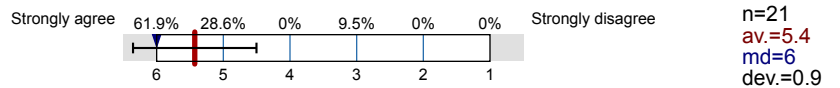

3) My instructor presents course material clearly.

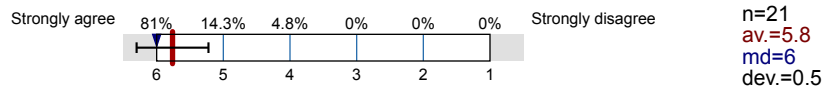

4) My instructor clearly communicates what is expected of me in this course.

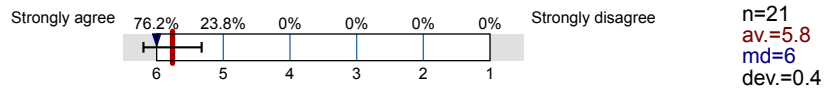

5) My instructor clearly communicates the grading policy for this course.

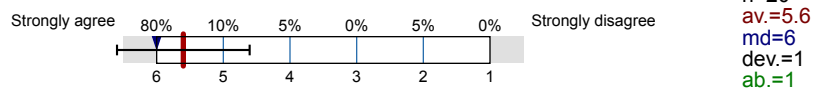

6) My instructor grades my work fairly and impartially.

7) My instructor maintains good rapport with the class.

8) My instructor actively helps students.

Satisfaction With Your Instructor

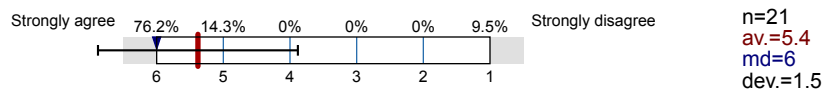

9) Overall, I am satisfied with how the instructor conducts this course.

10) Overall, I am satisfied with the educational experience this instructor provides.

11) I would enjoy taking another class from this instructor.

Comments Report

Additional Comments

- I absolutely loved this class! Professor Maxim made math fun, something that is very difficult. He is absolutely brilliant and knows his material like no other. He actually made me want to come to class every day to learn math, and he is the first teacher to ever do that. Absolutely recommend 10/10 best math teacher ever! Makes an outstanding addition to the staff at this school. If he offered another class I would need to take I would take it in a heartbeat. This professor is a keeper hands down. And he has a great sense of humor too, which is always appreciated! Overall, if you can't tell, he was amazing!
- I feel Maxim is a very fair professor with the way he conducts his class. I really liked that he required homework to be completed and turned in for a grade on a weekly basis, rather than having quizzes. I also really like the way he teaches. I like that he works out problems that are similar to the ones in the homework, rather than only re-working the example problems the book provides. At the beginning of the semester, I only set a goal for myself of obtaining a C in the course, but his teaching changed my goals for myself and I set out to obtain an A, and going into the final I had an A in the course which I never expected. I would definitely take another course with Maxim if the opportunity arises.
- I really liked the way he taught. Wrote out the definition of something and explained it very well and then we worked out tons of examples! Very good teacher.
- I think that Yattselev is a great professor. At first, he is hard to understand because he isn't too great at speaking English, but then after a while it is easier to understand him...and he's very nice. He is very knowledgeable about the subject, and is very helpful if you ask him questions. I would enjoy taking a course with Yattselev again.
- Overall it was my fault that I failed the course by taking too many credit hours. The instructor himself was outstanding.
- Professor Yattselev is an outstanding teacher. I really enjoyed his course. He always answered the questions of students and always proved the theorems we were using which was very neat to see. The tests were well written and I liked how he "curved". I hope he stays around in the future as I will be recommending him to future calc students
- Very difficult to understand the professor.
- Yattselev is very effective at getting the material to be covered out in the open and explaining it to you. He moves fast at times so we can get to everything but overall I wish more teachers taught like this. Every class we have a period of theory and then a period of quickly solving a ton of problems on the board and that helps me more than anything else.
