Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

Comments
It's harsh and difficult, but fair.
I think the grading is tough as we only have 2 exams and one final. The grade only based on homework and exams. I struggle a lot. Luckily, I still managed to maintain my grade.
I believe Dr. Yattselev is an extraordinarily smart professor, and I can see that he loves teaching mathematics and researching mathematics. However, one particular comment I would make about Dr. Yattselev is that when a student has a question to ask, Dr. Yattselev will sometimes interject in the middle of the question, and I have had this happen to me. I believe it comes off as a little defensive. Other than that, I believe he teaches the information you need for the homework, and tests, while also asking important questions to get students to think about solving important mathematical theorems.
Dr. Yattselev is a wonderful professor. Knows this material inside and out, has a passion and gift for teaching. 10/10 would recommend :)
The professor had a tendency to teach straight from the book. Besides that, I am satisfied with how the course was taught.
