Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

This is by far the best math class I've taken at IUPUI. Professor Yattselev presents the materials clearly and provides us with a lot of examples to clearly understand the concept as well as prepares us to do the Homework Problems by ourselves. The grading policy of his class is also very helpful, in terms of homework assignments which just boosts our grade. He also gives us time to ask our questions on the material thought and is receptive to us during office hours and overall he is a very good professor.
Dr. Yattselev was a very effective teacher, and I really enjoyed taking his class. Lectures were very useful and homework that he assigns really helps learn the subject.
My favorite thing about this course is that Yattselev uses examples to teach rather than covering theory in class and then leaving examples for us to figure out on our own accord during homework. Can't say enough good things about this class. I used the online version of the book on my phone to help follow along with lecture if I was confused or had to miss class (had surgery this semester so had a couple appointments). Wasn't happy with my first exam grade but when I got the test back, I saw that I just messed up one huge problem and Yattselev pointed out where I went wrong and wrote how to prevent that from happening again on my test. Very good prof and course
Yattselev was a really good professor and is good at reading the room when people are confused or he made a mistake. The only thing is he is picky about grading homework for certain details. Tests are hard but he is generous with extra credit as whole and grades the test easier than the homework. He provides every outlet to do well in this class.
Dr. Yattselev is an outstanding professor. He knows this material like the back of his hand and works faster than I can think when presenting the material. However, he is always available either on line, or during office hours and is extremely helpful when help is needed. He definitely challenges the students and is a very fair grader. I would definitely take another course with him as the instructor and recommend any engineering student to take his course as well!
Prof. Yattselev is very knowledgeable and communicates the course material clearly.
Great professor
