Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

Dr. Yattselev clearly cares about how his students are performing in the class. I found the quizzes and tests to be easy when I completed all of the homework. When I made mistakes, it was because I didn't do the homework. The grading was super fair and I felt like I got good feedback on tests.
overall, i think the class is great, I just wished that I had more free time to get the help needed.
The course material was explained in a complex manner that I believe could've been simplified a lot more for students to understand.

Good course, good teacher
I already took calculus before this taking this course (due to changing majors I had to take Calc 1 and 2 again), but after taking 165 I feel like actually understand Calculus a lot better than I did before and I really can appreciate that from how this course was presented. thank you
Thank you for all of your help this term, you're very kind and I appreciate that.
I love Professor Yattselev, he is amazing he is so understanding and is willing to spend time helping you understand the material, and the way he structures his class has really benefitted me, I'm actually learning the material and not stressing about how I'm going to pass the next big exam or whatever. I would love to take calc 2 with him but I'm not sure if he teaches that, overall I really enjoyed this class and I really don't enjoy math in general so that says something.
